EVA KAMAU

Cybersecurity | QA & Security Testing | DevSecOps

Nairobi, Kenya | +254 714 656 375 | evakamau494@gmail.com | linkedin.com/in/eva-kamau | evagibson.github.io

PROFESSIONAL SUMMARY

Cybersecurity and QA professional with an MSc in Information Security from United States International University Africa (USIU-Africa). Monitors systems with SIEM tools such as Wazuh and Splunk, investigates alerts and maps threat intelligence to MITRE ATT&CK. Tests web, mobile and API functionality manually and with Playwright automation, with a security focus on authentication, access control and the OWASP Top 10. Brings the two together in DevSecOps work with Linux, Docker, firewalls and VPNs. Looking for a full-time role in Nairobi in cybersecurity, quality assurance or DevSecOps.

SKILLS

Security Operations: SIEM (Wazuh, Splunk), alert investigation, incident response, log analysis, Microsoft Defender, vulnerability assessment (OpenVAS), threat intelligence (STIX 2.1, MITRE ATT&CK)

Application Security: OWASP Top 10, authentication and access control testing, API security, input validation, threat modelling

QA & Testing: Manual, regression, exploratory, functional, smoke, cross-browser and API testing; test case design; defect lifecycle management; release validation

Automation & Coding: Playwright, JavaScript, Python, REST APIs, Git, GitHub

DevSecOps & Infrastructure: Docker, Linux administration, NGINX, Caddy, SSH, UFW, pfSense, NetBird VPN, OIDC (Zitadel)

Networking: TCP/IP, DNS, VPNs, firewalls, network segmentation, NAT

WORK EXPERIENCE

QA Assistant, Tourlast

Nairobi, Kenya | Jul 2026 – Present

- Perform manual QA of a multi-platform online travel agency across web, Android and iOS, including regression, exploratory, functional, smoke and production-readiness testing.
- Test REST APIs, including investigating payment-related API and server-side failures.
- Introducing browser test automation with Playwright and JavaScript into QA workflows.
- Perform security-focused QA: authentication, password handling, access control and OWASP Top 10 scenarios.
- Design test cases from requirements; document defects with clear reproduction steps and evidence, and manage them through triage, retest and verification before release.

Cybersecurity Associate (part-time, as needed), Tourlast

Nairobi, Kenya | Oct 2025 – Present

- Deployed and maintain Wazuh SIEM in a Docker-based environment for endpoint and security-event monitoring.
- Investigate security alerts across Windows and macOS endpoints using Wazuh and Microsoft Defender for Business.
- Administer Linux servers and Docker deployments using SSH, UFW firewall and DNS.
- Work with self-hosted NetBird VPN, Zitadel identity (OIDC) and Caddy for secure remote access.
- Troubleshoot infrastructure and security issues across endpoints, network and servers.

SOC Analyst Intern, CFSS

Kenya | Aug 2024 – Sep 2024

- Supported security operations center (SOC) monitoring of security events and alerts.
- Assisted with event analysis, alert triage, incident handling and threat detection workflows.

Software Engineer Intern, Innovative Toll Solution

Kenya | May 2023 – Aug 2023

- Supported application development and software troubleshooting in a professional engineering team.
- Worked within the software development lifecycle (SDLC) and team collaboration workflows.

PROJECTS

Honeypot-Driven Cyber Threat Intelligence Framework (MSc Thesis)

Technologies: Python, T-Pot, Cowrie, STIX 2.1, MITRE ATT&CK, JSON

- Built Python processing logic that turned 4,265 Cowrie honeypot events into 770 STIX ObservedData sessions and a validated bundle of about 1,440 objects.
- Implemented detection logic mapped to MITRE ATT&CK T1110 (Brute Force) and T1105 (Ingress Tool Transfer); validated output with the STIX Validator.

Security Monitoring Infrastructure

Technologies: Wazuh, Docker, Microsoft Defender, Windows, macOS, Linux

- Deployed Wazuh on Docker and monitored Windows and macOS endpoints; compared endpoint telemetry with Defender alert visibility.

Virtualization & Secure Infrastructure Lab

Technologies: VirtualBox, pfSense, Linux/Ubuntu, Windows Server, SSH, UFW

- Built a virtualized network with pfSense covering segmentation, routing, firewalling and NAT across Linux and Windows Server VMs; documented the setup and troubleshot connectivity between segments.

JavaScript Stock / POS System (Personal Project)

Technologies: JavaScript, REST APIs, databases, Git, GitHub, Playwright

- Building an inventory and point-of-sale web app with a REST API backend and database, designing authentication and input validation, with security testing and Playwright automated tests.
